The interdisciplinary nature of tribology encompasses knowledge drawn from disciplines such as mechanical engineering, materials science, chemistry and physics. The interaction between these different fields of knowledge to achieve the final result, the control of friction and wear, is reviewed in this volume. This interdisciplinary approach has proven to be a very successful way of analysing friction and wear problems. In many cases tribology is viewed as an inaccessible subject which does not produce useful answers. In this volume the authors redress this problem by providing a comprehensive treatment of the subject. A basic feature of the book is the emphasis on describing various concepts in an accessible manner for the benefit of non-specialists. This principle is applied from the beginning of the book, where the reader is introduced to the fundamental concept of tribology. This concept is then often used to show how the various topics in tribology are interrelated to form one coherent subject. A direct graphical illustration of the mechanisms controlling tribological phenomena is presented. Carefully prepared diagrams allow rapid appreciation of the basic ideas and facts in tribology. The numerical analysis of hydrodynamic lubrication is supported by a number of computer programs which are included in the book. The control of wear is given extensive treatment with a thorough discussion of lubricant additives, solid lubricants and surface coatings. The effectiveness of coatings in suppressing specific forms of wear is analyzed together with the methods of coatings deposition. The book contains 474 figures and 44 tables. More than 1000 references are provided to give the reader access to more specialized information if required.

The volume is intended to provide graduates in engineering or materials science with an understanding of the fundamental concepts of friction, wear and lubrication.

From reader reviews:

Willie Collier:

Book is to be different for each grade. Book for children till adult are different content. As we know that book is very important for us. The book Engineering Tribology (Tribology Series) has been making you to know about other understanding and of course you can take more information. It is quite advantages for you. The book Engineering Tribology (Tribology Series) is not only giving you much more new information but also to become your friend when you sense bored. You can spend your current spend time to read your guide. Try to make relationship using the book Engineering Tribology (Tribology Series). You never sense lose out for everything if you read some books.

Jennifer Jones:

Reading a book to get new life style in this calendar year; every people loves to go through a book. When you study a book you can get a lot of benefit. When you read guides, you can improve your knowledge, simply because book has a lot of information in it. The information that you will get depend on what forms of book that you have read. If you want to get information about your analysis, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, these kinds of us novel, comics, in addition to soon. The Engineering Tribology (Tribology Series) provide you with new experience in reading through a book.

Brandon Francis:

On this era which is the greater man or who has ability in doing something more are more special than other. Do you want to become one among it? It is just simple solution to have that. What you must do is just spending your time very little but quite enough to enjoy a look at some books. One of several books in the top record in your reading list is definitely Engineering Tribology (Tribology Series). This book which can be qualified as The Hungry Hills can get you closer in turning out to be precious person. By looking up and review this publication you can get many advantages.

Dennis Haney:

You will get this Engineering Tribology (Tribology Series) by look at the bookstore or Mall. Only viewing or reviewing it might to be your solve issue if you get difficulties for your knowledge. Kinds of this publication are various. Not only by written or printed but can you enjoy this book simply by e-book. In the modern era similar to now, you just looking because of your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose suitable ways for you.
