## Baby Animals

Chubby puppies, furry kittens, fuzzy chicks, downy ducklings: Gyo Fujikawa's lovable baby animals will captivate children. They're big (elephants) and small (mice), plump (piglets), and playful (lambs). With each picture, kids learn a little bit about the animal—the sound it makes, how soft it might feel, and what it can do. Plus, they'll discover something else very important: that very young creatures have to be petted, snuggled, and hugged very gently...just like the children themselves.

#### **Julie Tice:**

As a scholar exactly feel bored in order to reading. If their teacher asked them to go to the library or make summary for some book, they are complained. Just tiny students that has reading's spirit or real their passion. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that reading through is not important, boring and can't see colorful pics on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Baby Animals can make you sense more interested to read.
