## Practice Problems for Mathematical Olympiad Competitions, Volume 2: Steve Dinh

This volume II comprises many mathematical problems suggested by the author to help the prospective contestants preparing for the Mathematical Olympiad competitions around the world as well as to help the general audience to learn the concepts and foundations of higher mathematics.

These problems are made up and tailored in such a way to parallel those used in the past international and national Mathematical Olympiad competitions in both the format and the degree of difficulty. Many of the author's previous suggested problems have actually been selected for those competitions as well as competitions taken places annually at many prestigious colleges in the United States.

Feel free to use these problems for the competitions in your country, but do cite their source on your test papers or on your website, and please let me know by sending an email to [stevedinh@yahoo.com](mailto:stevedinh@yahoo.com).
